Hey
Prison University Project

Thank's for the gift it really made my day. My name is Broderick Durento (AD6658) and I have been diagnosed with Super and I was at Chino State Prison were the C/Os and Staff members act like they didn't care. The C/Os started off correct then they fell off, they got tired of working and bringing food to us. So they made all the inmates (who were not sick) do all the work for them, like making 1,500 trays to go by ^{hand} and I was one of them. There was never a time were there was no movement, they continued to let every body hang out, and (they even had inmates) lining on the yard. Instead of trying to overcome the virus they were trying to find away to get inmates back to work.

But now I am currently at San Quentin State Prison and all the C/Os and free Staff are doing every thing correct. They are cleaning after each use of Shower, they are mopping the teas with Soap, they are working with good moods, they are making me feel cared about which is really great. Keep up the good work San Quentin L.O.L. I just hope and pray that I can get released due to my health soon. Feel free to share my letter for example.

Thanks Again Broderick Durento
