

My name is Gerald Franklin and on behalf of the residents here at San Quentin State Prison we would like to thank Warden Ron Broomfield and the outside communities concern in regards to the Covid 19 virus. As you all know that this virus is unpredictable and very dangerous and is rapidly spreading and our appreciation goes out to the scientist and government who are working around the clock to find a cure and resolution to this global problem, and considering this problem it is very important that we return to our families, an early parole program is desired most of us have children and are worried about their well being. We understand that if we were to be released due to Covid 19 strict parole conditions would apply. We should not be incarcerated during this state of emergency. Our families are very concerned for us and we are at risk, it is impossible for the prisons to perform the rehabilitation process at this time. This is a lesson that life can be very short and we should be home striving to become productive members of our society, please consider early parole we all stand together in this world problem so "lets live together" thank you

Gerald Franklin
