Prison university project, [REDACTED]

To the Prison university Project...

My Name is, Thomas J. French #BK8811.

I am currently a inmate in san quentin state prison in the reception area.. I am a transient to california. Originally, I am from the north eastern united states (NY) New York (VT) Vermont & (NH) New Hampshire. I have been in california for a year now, Ten months of that, I have been bouncing in & around C, A in a sheriff transport van.. Now, I am back in "sq." which brings me to this letter..

Thank you for showing me & people like me we are not just sitting waiting for the inevitable to happen to us like long forgotten pets..

We get cold food 3 times a day staff go's home & comes back unmasked with minimum checks done to insure our safety on our proposed release dates, I got 9 months left to, I hit get out on my E.P.R.D. I pray & hope to see that happen I and many like me are in a sea of not knowing.. We sit here in our cells 24 hours a

day. We get 1.15 minute phone call a week if we choose not to go to yard..

99.9% of us are asking what's going on. Many of us if granted our 3rd time would be possibly eligible for release.. I know that back east this epidemic has hit hard and I don't know how to respond to the fact that I have no where in 'cia' to go & can't begin to even think about what might & could happen while I am here.. But just the simple fact that knowing some one is fighting for us gives me & 100's of others a glint of hope!! Thank you for that in response, I am grate full..

Sitting in the dark is scary all the what if's are frustrating & some times the only thing a person can do is hope..

once again Thank you
Theresa Pugh

P.s. Feel free to use
this letter how ever
you wish
