April 27th

Dear, prison university project staff

I want to say thank you for taking the time to think about us. Thank you for the care package. I was asleep when they passed them out but I heard a bunch of yelling and whistles from excited inmates. It comes at the perfect time as just finding a stamp is hard to do. I used one to thank you and one to write my sister. The corona virus has affected me in more ways than just the lockdown.

On april eighteenth one day after my birthday I got a visit from the sergeant to make a phone call to my mom and sister. I knew it was bad. When my sister was crying my heart stoped. My mom was diagnosed with covid 19. she is sixty two years old and they said her chances were not good. They tried a experimental drug, she got worse and so they put her into a self enclosed coma to see if she would get better but she didnt. A few days later I got a visit from my cci to make another phone call. It was to my sister again she wanted to let me know that she had also tested positive for covid 19 my mom lives with my sister in nebraska so she was kinda expecting it. she says she will be ok she is twenty eight and healthy. I will know more about how she is doing when we make are phone calls on wednesday. The staff here at san quentin have been very helpful and considerate during this time I feel they know its hard on everyone. They give us free phone calls everyweek which is great because phone time is expensive. So with eyerything

Thats going on I feel like the staff has done a good job
In helping us and, I feel like the Inmates have behaved.
I wish that we could maybe get a weekly memo to let
us know whats going on with our transfers and maybe
a estimate on when program will return to normal. I
have been In reception since December 9th I have less
then a year to my release. I have been approved for the
A.C.P program but do not have enough Information to go
about finding a program to be released to so I feel maybe
they could assist us with more Info on that. I have also
been approved to goto firecamp and endorsed to one.
I also know that carson section Inmates have radios and
I think Its a long shot but maybe they could give the
Inmates In reception as we are In our cells basically twenty
four hours a day. All in all I feel like everyone has done
there part to help everyone get threw this difficult time.
So again I thankyou for lifting my mood at the time when
I need It the most.

yes it Is ok to use this letter In any
way you want.

Sincerely Lucas Partain
