First i want to say thank you! It's nice to know that someone has not forgotten us. It's really nice to know that there is people still out there pushing for us.

I'm one of those persons with existing health issues. I was recently housed at "Pleasant Valley" were i caught "Valley fever" Also known as "Cocci" i know have it in my spine, neck, & bones. The bad thing is that the prison took so long to belive that there was something wrong with me. That by the time i finnally got an MRI done, it had already gotten into my whole back. Even though the prison tested me twice & said i was negative. The hospital said i was positive, there is no cure & im on the medication for the rest of my life. Well theres a little information about myself

#2

and why its good to know that there are people out there that still care.

Aside from that, we are okay, just hoping that we all get through this.

I'm going to enclose a quick little drawing to show my appreciation to Godly & the entire prison University project.

So feel free to share my letter & drawing as well. If any one finds this of some interest and would like to correspond, feel free to do so.

I want to say thank you again, take care, be safe, and never let the bumps of life get the best of you.

Respectfully

Angel Ruiz
