Prison University Project,

4-27-20

First off, on behalf of myself and I'm sure many more inmates, thank you guys for the care packages. As most people are probably aware food, writing utensils and body care items are commodities. And those things as well as love and support from the outside world make times like these bearable. I know the world outside these walls is in a pandemic we've never experienced, and there's many of us behind these walls in a situation we've never experienced. Like currently being placed in the "Administrative Segregation" building for non-disciplinary reasons due to this co-vid 19. Conditions in here currently are put simply, unfair, but kind acts from the outside world definitely bring light to otherwise dark days. Thank You guys for your kindness and please feel free to share my letter.

Sincerely,

Manni Sutton
