4-29-2020

Thank you for the packages with the little things that count. The article of things relating to Covid-19 is really appreciated.

Being that im one of the few stuck in reception centers. This time being stuck behind bars is stressful for the fact i just got to prison and im waiting to transfer to a prison. To be able to receive the extra benefits prisoners have when their are classified.

Like more time on the yard out the week to be able to get on the phone to contact my family. Instead of once a week for 15 minutes we receive in reception.

Thats why the articles are appreciated cause it gives a more detail out-look on Covid-19. From people that study Covid-19 or a part of the gossip.

Thank you for the snacks they were good. They where even more

delicious in a Jail House made meals.

I hope everyone on the outside is taking elaborate steps to slow the spread of Covid-19. Those who are effected by this pandemic stay strong and keep faith this will past as long as we have respect for our selfs and those around us to not spread the virus.

Thank you again to those at Prison University Project / MT. Tamalpais College and friends, also the New Warden, Ron Broomfield.

Its okay to share this letter on your websites or email messages to our community.

Sincerely

Rico K. Thomas-Merritt
